

Metal rolling open to sheet metal

Metal workshop

Copper tube bending machining

copper bend machine

Aluminum fin punching machine

Heat exchanger tube expanding machine

Tube soldering by automat machine and pipe soldering by worker well

Leak testing in water ,high pressure N2 gas 3.0MPa charged inside of heat exchanger.

Fan blower making shop

fan wheel making

fan wheel making

fan wheel balanced test after production

Fan coil assemble line

Fan coil producing progress flow chart.

Fan coil run test room to check fan speed ,noise, electric insulation ,electrical leakage etc

After packing sitting in stock
